

THE PROBLEM

While Latin America and the Caribbean is a region rich in natural resources and splendors, it is also marked by great socio-economic inequalities and high poverty rates. 90% of the region's 600 million inhabitants receive just 2% of all income, making it the most unequal region in the world.

THE RESOURCE FOUNDATION

Established in 1987, The Resource Foundation empowers the disadvantaged with the skills, knowledge, and opportunities they need to improve their lives. Through our partnership model we supply grants and technical assistance to support the work of 198 high-impact organizations in 27 countries. These organizations implement a variety of self-help projects related to education, affordable housing, jobs skills training, healthcare and HIV/AIDS, potable water and sanitation, sustainable agriculture, disaster relief, capacity-building, and microenterprise development. Through these programs, The Resource Foundation has helped millions of families increase their self-sufficiency and improve their lives. Corporations, individuals, and foundations look to our expertise and knowledge of the region's nonprofits to support projects that make a difference.

Thanks for your continued support.
